

# Vladyslav Cherkashyn

SOFTWARE ENGINEER  
HANDS - ON JAVA

## ABOUT ME

*I'm a communicative team player, ready for new challenges. Hard problems for me is like a puzzles, that I'll solve in logically easiest way. I am very open to learning new information and technologies. Just give me the chance and you will see how quick I can meet your company goals.*

## EDUCATION

### Software Development Academy

*Java from Scratch (380,5 hours) | Oct 2019 - Aug 2020*

# Java # GIT # Coding  
# Software Testing - TDD # Databases - SQL, MySQL  
# JDBC, Hibernate  
# HTTP # HTML, CSS, JavaScript, Angular  
# Spring Framework # Scrum Methodology

Final project description: Checkify App is made for people that don't want to worry about their products in fridge, they concentrate on more important things, our app will make your everyday life much more easier.

We used Java Spring framework(Spring Boot, Spring Security, Spring Data) for backend part, Jackson for parsing JSON objects, REST, HTML + CSS + Angular for frontend part, open source library QuaggaJs for scanning barcodes and looking for products in BarcodeMonster API.

My main part in project was to add and configure QuaggaJs and doing backend part of the app.

*Krimelte | Sep 2018 - Jan 2019*

- Making high quality sealants

**Developed skills: communicating, working as team, responsibility for product, that I'm making**

## HOBBIES

Playing computer games, reading technical and fictional books, solving puzzles and playing tabletop games.

## REFERENCES

"Vladyslav was my charger :D

Being a trainer, it feels like receiving tremendous energy and forward push once you have a guy like him at the class.

He has lots of creativity at disposal and very well knows how to incorporate that.

He knows where to start and how to follow along to deliver high quality and clean code.

He sticks to the rules and guidelines. I believe him to be the royal flush for any employer since he is responsible, motivated, team player, and attentive. I wish you good luck, Vlad."

- Hatef Palizgar, trainer at Software Development Academy.
